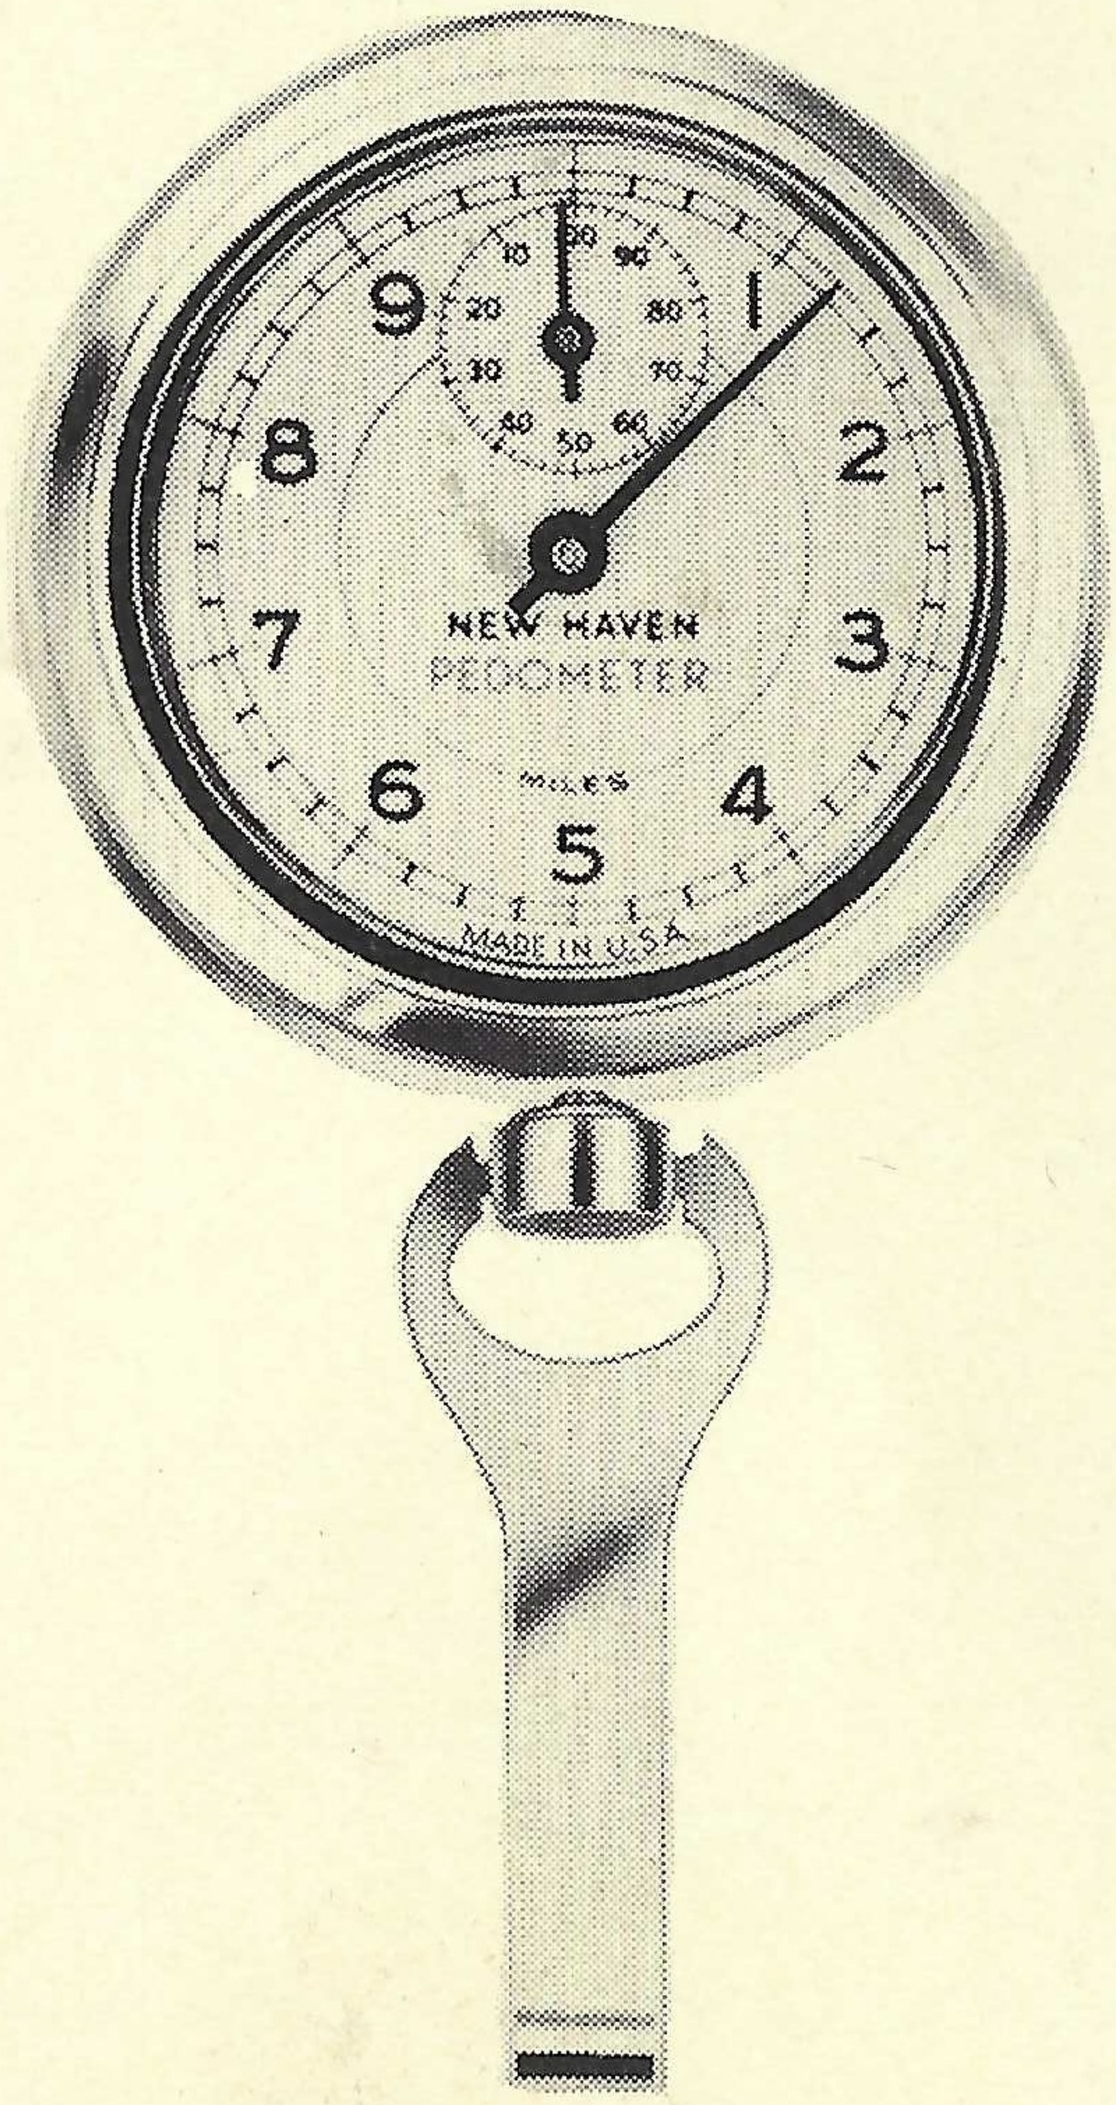
NEW HAVEN MODEL 230

PEDOMETER



INSTRUCTIONS

Your new PEDOMETER is a precision instrument that has been designed and calibrated so that it will show on its dial the number of miles and quarter miles you walk. It will measure up to 100 miles and is adjustable to your stride.

Before using your New Haven PEDOMETER please read the following instructions carefully. Whether you are walking for pleasure, health, work, or sport, it is certain to add a zip to your step and a positive answer to the question "How far did I walk today?".

HOW TO USE YOUR PEDOMETER

A. The New Haven PEDOMETER has a self starting mechanism that is set in motion by the walking or the leg action of the user.

B. The PEDOMETER functions just like a pendulum and must therefore always be carried in a perpendicular position when in use. It has a clip which has been designed to enable you to place it on your person most conveniently. It should be suspended from the belt, waist, or on the inside or outside of a side pocket, always remembering that it is the movement of the leg which operates the PEDOMETER.

C. Before use, or whenever you wish to start measuring, the hands of the PEDOMETER may be set to zero by turning the Hand Set Screw in the back of the case with a slight twisting pressure of the finger, a coin, or the eraser end of a pencil.

D. Although your PEDOMETER has been set for an average stride (25"-27") before leaving the factory, it may be necessary that you adjust it further for greater accuracy. We recommend that you walk a measured mile with the PEDOMETER properly on your person. If, when you have completed the distance, the large pointer is on 1 then the instrument is perfectly adjusted for you. Most of the time, however, you will find that it measures over or under due to your particular manner of walking. This indicates that an adjustment is required and it should be done in the following manner:

Remove the **back** cover of the PEDOMETER by prying it outward carefully. You will notice a Stride Regulator with numbers much like the slow-fast lever adjustment found in any watch or clock. If, in your test walking, the PEDOMETER registered **less** than a mile move the Regulator Pointer several numbers or clicks higher toward FAST. If you found it to read **over** a mile then the Pointer should be moved accordingly toward SLOW. A little patience in adjusting it accurately will not only insure its reliability but add immeasurably to your walking pleasure.

Pedometer Guarantee

This is to certify that your New Haven PEDOMETER has been scientifically inspected and thoroughly tested. It was produced by expert American craftsmen and regulated for a reasonable degree of accuracy. Therefore, we guarantee your New Haven PEDOMETER for 90 days from date of purchase against all defects in material or workmanship. This guarantee does not cover damage resulting from misuse or other causes over which we have no control. If your PEDOMETER fails to render satisfaction under the terms of this guarantee, it will be reconditioned or replaced provided it does not show unusual signs of wear; and is forwarded to us prepaid with **$1.00** to cover handling, packing, and postage for return. This guarantee is void if PEDOMETER has been wet, tampered with, improperly oiled, or otherwise mistreated. This guarantee is given by the Pedometer Corp. and not by the dealer from whom your New Haven PEDOMETER was purchased.

PEDOMETER CORPORATION
